Samson

Sen. Kelly Ayotte (R) NH dedicates the new Samson facility in Keene, NH

Sen. Kelly Ayotte (R) NH gets a lesson in Practical Shotgun shooting from Samson shooter Bryan Ray of Elizabethtown, KY.

As this catalog goes to print, we are in the final days of 2012. Looking back I am not sure how we fit all of the milestones into only 12 months.

Samson manufacturing moved its entire operation into a new facility in Keene, New Hampshire. We have remodeled and made ready for all of our production equipment and purchased even more to help out with the demand for our products. This multi-million dollar enhancement, has us now operating some of the best equipment in the industry, adding many new team members and relocating the existing team.

2013 brings the release of many new exciting products, including three new vertical grips designed for our popular Evolution System. Exciting new manual deploy sights, and a front and rear fixed sight round out our popular series of QuickFlip sights. These low profile sights are all 6061 T-6 Aluminum and Stainless - no plastic here. These sights are being used by large OEM's like Ruger and Sig Sauer. We are perhaps most excited about our new quick detach Rotary Acuated Mount (RAM) It is a new mount with a whole new direction. Small and low profile. Expect to see a whole line of new products utilizing this new patented system in the near future.

We appreciate our customers patience during our phone and computer system upgrades in 2012.

*Scott W. Samson
President
Samson Manufacturing*

Samson introduces an exciting line of new low profile mounts, called the Rotary Actuated Mount. (RAM) This remarkable low profile, hard use mount is guaranteed to return to zero. As shown on the right, this mount uses a rotary actuated lever to lock tight on 1913 rails, even those which are out of spec. The RAM will not mar or damage your rails. Simple in design, the RAM will work perfectly in harsh environments. A locking mechanism will hold the lever in its locked position, - until you unlock it.

The RAM be available for optics, night vision and accessory mounting in early 2013. - Stay tuned...

NEW EVOLUTION SYSTEM ACCESSORIES AND QUICKFLIP® SIGHTS FOR 2013

Samson has added new manually deployed QuickFlip® sights, and a set of fixed front and rear sights to our popular line of QuickFlip® sights. For more information, see pages 15-16.

In addition, we added three new vertical grips designed specifically for our popular Evolution System. See page 17 for details.

3

the **EVOLUTION**™ system

The Samson Evolution Series is the next step forward in free floating hand guards. Light weight and durable these offer the perfect upgrade for 3 gun shooters, LE/Military or weekend enthusiasts alike. The 1.8" faceted O.D .offers a comfortable shooting platform while not being to large for most shooters. Accessory rails can be added or removed easily to adapt the hand guard to your needs. (units can also be mounted at 45 degree offsets). Patent Pending

The thermal bushing locks onto the stock barrel nut for a rock solid lock up.

Thermal Bushings helps to substantially reduce heat transfer to the handguards.

No special tools required for installation. Short tabs on either side of the upper receiver keep the Evolution rail from rotating.

There are Evolution rails available to fit most common piston systems on the market.

S.T.A.R. CARBINE RAILS

Samson STAR carbine rails are the perfect balance of weight and strength. Manufactured from 6061 T6 Aluminum, the STAR rails are compatible with most piston systems. All STAR rails allow for the mounting of M203 systems. Each rail mounts via the standard AR15 barrel nut and forms a continuous top rail. A winged clamping device prevents barrel nut rotation. Rails at twelve, three, six and nine o'clock are guaranteed mil-spec. Offset accessory rails may be mounted at 45 degree angles. All Samson STAR rails free float the barrel, with the exception of the DI model, which is a direct drop in with absolutely no modification to the carbine required. All rails are hard coat anodized with white laser engraved "T" marks. Each Samson STAR rail comes with standard QD sling attachment points on the left and right sides as well as on the bottom.

Samson STAR rails are compatible with the following piston systems: Adams Arms, Addax Tactical, LWRC, Aries, S&W, Sabre Defense, CMMG. Our EX rails may fit others, but we have not been able to personally test them.

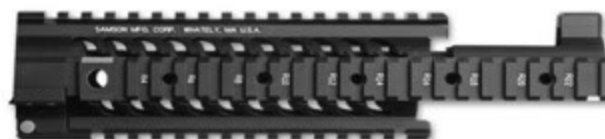

888 665-4370 samson-mfg.com

The STAR C Rail is a standard 7" length free floating carbine rail. It offers a removable lower for M203 compatibility. 10.5 oz. **\$269.00** Code: STAR-C

The STAR CX Rail is a free floated carbine length rail system with a cut-out for the front sight base and an open bottom below the base. The CX has a 10" rail for mounting accessories. 13.2 oz. **\$309.00** Code STAR-CX

The STAR CX EBR Rail is a free floated carbine length rail system that fits over the front sight base. The CX EBR has an extended 10" bottom rail for maximum rail space. 13.2 oz. **\$310.00** Code: STAR CX EBR

The STAR C-EX-P Rail is a free floated carbine length rail system compatible with most piston systems. The C-EX-P has an extended 10" bottom rail for maximum rail space. 13.6 oz. **\$309.00** Code: STAR C-EX-P

The STAR CXR Rail is an extension of our CX-EBR rail and allows for extended hand hold and mounting of a weapon light at 12:00. Weight 16.0 oz. **\$329.00** Code: STAR-CXR

The STAR MX Rail is for use with carbine or mid-length uppers. The 10" rail is designed to fit over a low profile gas block. 15.3 oz. **\$289.00** Code: STAR-MX

The Samson DI Rail is a drop-in rail system that does not require permanent modification to the weapon. At 9.1 oz, the DI is a solid addition to any carbine. 9.1 oz. **\$199.00** Code: STAR-DI

Woolrich Elite Long Sleeve Lightweight Operator Shirt

Professionals from a wide variety of services have heaped praise on our standard long and short sleeve shirts (shown on page 11). Their one request: Could you make that same shirt in a lighter fabric for summer months and warmer southern regions? Our answer is the Lightweight Operator Shirts made of 100% cotton ripstop. The fabric is lighter and cooler than our standard-duty shirts, but we kept the essential features like DuPont™ Teflon® fabric protector to repel water and oil based stains, UPF+ 30 for sun protection, a zippered concealment pocket, a hidden button-down collar; utility pockets with zipper closure; a three-piece ventilated back. The long sleeve version also features underarm gussets with vent holes, reinforced elbows, and convertible roll-up sleeves. Both long and short sleeve versions are available in Khaki, Black, Sage and Navy. Easy care with machine wash, tumble dry and cool iron as needed. Sizes S, M, L, XL, 2XL, 3XL. Imported.

Code: 44912_Woolrich_Elite_Long_Sleeve_Operator_Shirt

Price: \$59.99

Woolrich Elite Pant

Offering long lasting durability, functionality and comfort, the Elite Pant and the Elite Cargo Pant are manufactured of fade resistant, rugged 8.5 ounce 100% cotton canvas that will stand up to continuous use. What's more, they are treated with DuPont Teflon® fabric protector providing a breathable, durable barrier that repels both water and oil based spills. The Elite Pant features ten strategically placed multiuse pockets, including two hidden back pockets, two cargo pockets and two utility pockets (the Elite Cargo Pant offers two additional ankle cargo pockets). These pants are built for durability with critical seams double-needle stitched and bar-tacked at stress points. The waistband has side elastic panels for all-day comfort and freedom of movement, and there is a concealed brass zipper front fly along with a metal tack-button closure for strength and reliability. The reinforced belt loops will accommodate belts up to 2 inches wide. Easy care: machine wash, tumble dry and cool iron as needed. Even waist sizes 28" - 48". Inseam even sizes 30" - 36". In Black, Khaki, Navy, and OD Green

Code: 44429_Woolrich_Elite_Pant

Price: \$54.99

Woolrich Elite Vest

The Elite Vest is both a functional tool and a good looking piece of gear. The vest features two hand warmer pockets to hold frequently accessed items, as well as vertical strategically positioned "Napoleon" pockets to accommodate glasses, a wallet, a spare magazine, or a small frame revolver or auto. Four hook-and-loop flap pockets are capable of carrying a variety of gear, including spare magazines. Two deep zippered security pockets, two smaller zippered patch pockets, and two open pockets (one with two pen slots) round out the front of this vest.

There are four more pockets on the inside: two easily accessed, large front pockets and two open pockets at the lower back to accommodate a radio or like item with elastic loops near the shoulders to keep wires in place. Sizes S, M, L, XL, 2XL, 3XL. In Black, Khaki, Sage, Navy, and OD Green. Imported

Aimpoint M4, M4s Red Dot Scope

The Aimpoint CompM4 series of sights are the finest sights that Aimpoint has ever produced. Improvements include improved energy efficiency that provides up to 8 years of continuous use from a single AA battery! The CompM4 sights incorporate an integral mount that eliminates the need for a separate ring, and can be customized with vertical and forward spacers to fit a variety of weapon systems. They can also be used by hunters and sport shooters that need night vision compatibility. To accommodate our customers, the CompM4 series of sights are available in two versions: The CompM4 offers a high battery compartment, while the CompM4s offers a low battery compartment.

Aimpoint Micro T-1 Red Dot Scope

Micro T-1 - No matter what your mission, the size and weight of your equipment is a critical factor. With the Micro T-1, Aimpoint has introduced an aiming system that provides the performance of our full-sized sights in the smallest package possible.

Built to offer the same battle proven ruggedness as other Aimpoint products, the Micro T-1 is able to perform under extreme conditions while adding negligible weight to your weapon. Suitable for use on Rifles, Carbines, Shotguns, Submachineguns and Handguns, the Aimpoint Micro T-1 is ideal as a stand-alone sight, and can also be "piggy-backed" on top of larger magnifying scopes, night vision, or thermal imaging optics. The Micro T-1 can also be used by hunters and sport shooters that need night vision compatibility.

THE SAMSON® FIELD SURVIVOR®

Samson®

Imagine having every tool you need to get your AR back into service, right from your pistol grip. The Samson Field Survivor® is a multi-tool system that has a patent-pending mechanism which secures inside the pistol grip. The Samson Field Survivor® contains: a broken shell extractor, wire brush for bore cleaning, an ampule of oil for one field lube, a cable to pull the brush through the bore, a carbon scraping tool, a feed lip gage, a front sight adjustment tool, a flat blade screwdriver, a feed lip adjustment tool, a gas key cleaning tool, a cotter pin hook, and a strike plate. The Survivor also comes with a spare extractor pin and two firing pin retaining clips. The Field Survivor® tool is the one tool necessary for every AR to keep you safe in combat, or in play on the range. Just insert the Survivor into place and twist the base to lock it in place. The Field Survivor® fits all A2 pistol grips and Hogue AR15 Rev 2 grips, Magpul MIAD and MOE grips and now the Hogue AK grip - only. Weight 3.5 oz.

Price: \$94.99 Codes FS-001 Hogue/A2, FS-002 Magpul, FS-003-AK FS-004 Stag Piston
