

# Samson<sup>®</sup> +2+ MAGAZINE EXTENSION FOR THE GLOCK<sup>®</sup> G43<sup>®</sup>

**ALWAYS MAKE SURE YOUR MAGAZINE IS UNLOADED BEFORE BEGINNING PRODUCT INSTALLATION.**

**NOT FOR USE WITH 147-GRAIN 9MM AMMO.**

**Step 1** With a 7/64 hex wrench, use the long end to depress the retaining plate which will allow it to release the base plate.

**Step 2** Slide the factory base plate forward and off of the magazine body, then remove the existing retaining plate.

**Step 3** Attach our new replacement retaining plate to the spring and snap it into place.

**Step 4** Press the replacement retaining plate into the magazine tube.

**Step 5** Hold the retaining plate inside the magazine tube while sliding the +2+ Magazine Extension from the front to the rear.

**Step 6** Use the hex wrench to hold the retaining plate out of the way while you continue to slide the +2+ Magazine Extension onto the magazine tube.

**Step 7** Once the +2+ Magazine Extension is move fully forward, use the 7/64 hex wrench to install the cap head screw. You might want to use a drop of blue thread locker here.

**Step 8** Finally, use the 7/64 hex wrench to depress the retaining plate to insure it is properly seated. Fully load your magazine and insure they hold full capacity (8) rounds.
